# Macomb County Health Department

# Emergency Preparedness

# Emergency Preparedness

The Macomb County Health Department has received funding from the Centers for Disease Control and Prevention (CDC) since 2002 to plan for public health emergencies such as an influenza pandemic or a biological, chemical, or radiological terrorism event. Planning activities have been coordinated with surrounding County Health Departments, area Hospitals, County Emergency Management departments, and other community partners.

# Emergency Preparedness

- ◆ Development of mass vaccination and medication dispensing plans.
- ◆ Development of expanded surveillance capabilities for the detection of infectious agents.
- ◆ Development of plans for the management of mass casualties and fatalities.
- ◆ Participation in tabletop and full-scale emergency exercises with area Hospitals, Selfridge Air National Guard Base, and other community partners.
- ◆ Training of department staff for alternative roles should a response to a public health emergency be necessary.
